Milk starts on the farm.

Milk comes from healthy, well-fed cows. Oregon’s dairy farm families make sure each cow gets a nutritious diet, a comfortable place to live, exercise and regular health care check-ups.
Cows love the milking parlor.

The cow’s udder is washed first. Then the milking machine is attached and the milk travels from the cow through pipes to the milk storage tank. Cows like to be milked two or three times a day.
The milk tank keeps things cold.

The milk is cooled as it moves to the refrigerated milk tank, which keeps the milk cool, fresh and safe.
Then a **truck** picks up the milk.

Milk is picked up from the farm every day, and it is tested for quality and safety. The tanker truck hauls milk to the dairy plant — sealed and refrigerated the whole way.
Testing continues at the plant.

Milk is tested again and again at the dairy plant for safety and quality. If it fails, the milk is discarded.
The dairy plant pasteurizes the milk.

The milk is quickly heated and then cooled again at the dairy plant—a process called pasteurization that ensures milk is safe and wholesome.
Milk is packaged in the plant.

Once cooled, the milk is packaged in jugs or cartons. Then it’s stored in a refrigerated room.
Milk is delivered fresh to you.

Milk is transported in refrigerated trucks to schools, grocery stores, and restaurants. Always fresh, cold and nutritious.
Milk and dairy products are nutritious and delicious.

Milk is also made into yogurt, cheese, ice cream, butter and other tasty products.
Cow jokes for you to share.

Did you know?

75% of a cow’s diet is inedible by humans. Cows can digest parts of plants that people can’t eat.

Milk is used to make dairy foods like cheese, yogurt, butter and ice cream. Yum!

Cows are treated so well some have their own waterbeds and backscratchers.

Milk became Oregon’s official state beverage in 1997.

Milk is local! It takes just 48 hours for milk to get from the cow to the grocery store.

Dairy cows first arrived in Oregon in 1838. Today there are dairy farms in 21 Oregon counties.

Make this healthy smoothie at home.

Ask an adult for help.

Banana Berry Blast:

• 1 banana

• 1 cup fresh or frozen berries (any kind)

• 6 oz. yogurt (plain or vanilla)

• 1 cup milk

In a blender, mix until smooth.

Add more milk if you want a thinner smoothie.
Milk is a nutritional powerhouse packed with calcium and eight other essential nutrients that fuel your body and strengthen your bones. With so many delicious products to choose from, there’s something for every member of the family.
